

Conclusions & Perspective Outlooks

Conclusions: 4 key take homes

- Flexible problem formulation through **mathematical programming** and **convolution theory**
- **Multiple User-defined NBS**, including atomic and widespread solutions
- **Multiple Urban Challenges** can be addressed, both **environmental** and **social**
- **Cumulative benefits of different NBS within a neighborhood**, including concurrent benefits

Perspective Outlooks

- Consider **additional Urban Challenges**, and **NBS in new use-cases**
- In depth experimentation to **develop a holistic NBS planning support system** for both public and private stakeholders
